

Dear Parent,
Greeting from Syna International School!!

In continuation of concern for our students, we, the Management at Syna has identified and analysed that many of our students, who do exceptionally well at the CBSE board exams, failed miserably in competitive exams like CA-CPT, CS and CLAT. This is not because they are not capable of cracking these exams; but it is because they start preparing LATE for these exams.

After many rounds of meeting with experts, Syna Management team has analysed that if students start preparing for these exams right from class XI, their likely chances of clearing these exams will rise to 300%.

In continuation to this we have arranged a Career Counselling Seminar on 19 Jan 2018 for Class X & XI students. This Career Counselling Seminar was presented by the team of Career Classes, Indore (a renowned training institute for the preparation of CA, CS and CLAT). The team did a systematic career planning of your ward and guided them on the following points:

- Career Spectrum for Commerce Stream
- CA | CS – Evergreen careers for commerce stream
- CLAT – The new age emerging law career for all streams
- Benefits & need of School Integrated program

The key points emphasized during Counselling Seminar by Career Classes team are summarized below for your ready reference-

- Students should primarily focus on XII board exam and team guided them for securing full marks in respective subjects.
- Team extensively guided them on time management and stay motivated during their most stressful years of career building.
- Most of the students after passing class X opt for Science & Maths stream without analysing fierce competition and their own strength & weakness (Every year around 13 Lacs students appear for IITJEE & around 11 Lacs for NEET exams for competing for few thousand seats)
- Students opt for Science under social pressure. Team also suggested that this trend is in reverse because most of the engineers are unemployed today.
- Post demonetisation & GST era, India is witnessing a steep short fall in Human Resource in Commerce & Management Industry. Today India needs 5 times more CAs & CSs as required in past.
- AS Sensex is making a new high every now and then, GDP will grow up, eventually new companies will form, which in turn will open doors for new CAs, CSs & law professionals.
- Indian law market is still untapped. As per a survey of economic times the country needs 5 lac legal professionals.

In the light of above concerns shown by team and our own research, Syna Management is strongly proposed to go in for a School Integrated Program in COMMERCE field for the preparation of CA, CS & CLAT from the coming session on payment basis.

In the proposed School Integrated Program (SIP), a specially recruited residential team of experts under the supervision of career classes, Indore will teach students not only for their CBSE syllabus(i.e. Class XI & XII preparation) but also train them for CA | CS | CLAT entrance exams in parallel after school hours.

This proposed school integrated program will not only foster our students chances of getting good marks in board exams but also improves their likely hood in Cracking exams like CA, CS & CLAT. This way Syna International School and its students will contribute in India's Growth.

We invite and welcome you for any suggestion and concern. We also seek your consent to start this program in school.

Principal
